

Technical Program of INCE/J Special Lecture Meeting

1. Date/Time 13:30 ~ 17:30, September 12 2011
2. Venue Conference room An-3, Institute of Industrial Science, the University of Tokyo
3. Host INCE/J
4. Co-sponsorship Acoustic Society of Japan,
Office of Odor, Noise and Vibration, Ministry of the Environment
5. Support The Engineering Academy of Japan
6. Organizers Ichiro Yamada, Kohei Yamamoto, Hiroyuki Imaizumi, Shinichi Sakamoto and Hisao Funaba
7. Purpose INCE/J has newly started its activities as a **Public Interest Incorporated Association** from April 2011. INCE/J hosted a congress of INTER-NOISE 2011 early in September, 2011 in Osaka. Taking this opportunity, it held a special lecture meeting by well-known researchers on the world and US situation concerning noise policy for transportation noise as well as standards and regulations for the control of noise problems around wind-turbine farms in foreign countries. Power supply has become an urgent issue after the east-Japan earthquake on March 11, 2011 and the nuclear power plant accident caused by Tsunami. Wind-turbine power generation has been attracting notice as a prospective natural energy resource.
8. Program of the meeting
 - Part-1:Lecture
 - Lecture-1: Dr. W. Lang & Prof. T. Kihlman:
Perspectives on Transportation Noise Policies Worldwide
 - Lecture-2: Dr. Lawrence S. Finegold:
Towards a Quieter America
 - Lecture-3: Dr. Mark Bastasch:
Recent worldwide situation on the issues of Wind Turbine Noise
 - Part-2: Panel Discussion
 - Coordinator: Prof. Hideki Tachibana
 - Panelists: All lecturers and Mr. Takashi Omura (Head, Office of Noise & Vibration, MOE)
 - Summary: Prof. Hideki Tachibana
